

Interstate '76: Keyboard and mouse i76-everywhere control map (WASD-style). This is not the 1997 key layout; the last page compares the two.

Key colour and corner letter = group. Shift + arrow keys move the outside camera and the map. Keys with no label are not bound. F-keys and Esc are engine keys, not in input.map.

D Driving	W Weapons	T Targeting	V Views	S Systems	Mouse
Throttle / brake, analog Steer, analog Accelerate Brake Steer left Steer right Gear down Gear up Handbrake Reverse (toggle) Ignition (start engine)	Joystick 1 Y Joystick 1 X W S A D , . Space X I	Enter Tab F 2 3 4 5 6 7 8	Q Y T U R K 		

Status. Map: the owner's daily-driver map, copied 2026-10-03. The dedicated arrow keys look around and W A S D drive (owner, 2026-10-03). A fresh install made by INSTALL.bat has not been started by anyone on this project (INSTALL.md, Evidence): on such an install this page is read from the files, not played. Buttons 4 and 5 need the AutoHotkey layer (i76-remap.ahk); the wheel needs i76wheel.exe, started by PLAY-i76.ps1. Status of the wheel helper: not recorded (ENHANCEMENTS.md).

LT (left trigger)
Fire hardpoint 2 (hold) 2

LB + Fire hardpoint 5 + Fire hardpoint 2 (hold) 5 2

LB (left bumper)
Target in front (tap; hold = SHIFT) Q

LS (left stick)
Throttle / brake, analog native: joystick1 Down/Up
Steer, analog native: joystick1 Left/Right

L3 (press left stick)
Special 1 (nitrous slot) (hold) 6
Reverse (toggle) (pressed with the left stick pulled back) X

D-pad up
Headlights H

LB + Binoculars B

D-pad down
Ignition (start engine) I

LB + Horn (hold) G

D-pad left
Notepad N

LB + Gear down[†] -

D-pad right
Map M

LB + Gear up[†] =

Back / Select
Pause menu / skip cutscene Esc

Hold LB for the shift layer (the LB + lines). Small grey text is the key the AutoHotkey layer types. The left stick is the only native binding; without the layer (i76-remap.ahk, started by PLAY-i76.bat) the buttons do nothing.

- † Known mismatches (left as the owner plays it):
- Pad B sends 'C' for cycle weapon. The map binds cycle weapon to Tab and nothing to 'C'. The control does nothing.
 - Pad LB + RT sends '1' for hardpoint 1. The map has no hardpoint 1 binding at all. The control does nothing.
 - Pad LB + D-pad left sends '-' for gear down. The map binds gear down to ';' and nothing to '-'. The control does nothing.
 - Pad LB + D-pad right sends '=' for gear up. The map binds gear up to '.' and nothing to '='. The control does nothing.

Status. Pad layer: "deployed, verified on Mac/Windows" (RELEASE-PLAN section 1). The docs do not record a play test of the pad on this map; controls marked with a dagger send a key this map does not bind. Connect the pad before launching. Without the AutoHotkey layer a pad has the left stick only; this map binds no pad button natively.

RT (right trigger)
Fire selected weapon (hold) Left mouse button
Fire hardpoint 3 (while the right stick is held back (rear view)) 3

LB + Fire hardpoint 1[†] (hold) 1

RB (right bumper)
not bound

Y
Chase camera + Cockpit view (alternates) F3 F1

LB + Cycle camera views (one step per press) F1 F2 F3 F7 F8 F9 F10

X
Next target Y

LB + Radar range R

B
Cycle weapon[†] (tap) C

LB + Fire hardpoint 4 (hold) 4

A
Fire selected weapon (tap; types a click and Enter: OK in menus, one shot in the car)
Left mouse button Enter
Special 1 (nitrous slot) (hold 0.4 s) 6

LB + Fire hardpoint 3 (hold) 3

RS (right stick)
Look around (held while deflected)
Up Down Left Right

R3 (press right stick)
Look at target E
Fire hardpoint 4 (while the right stick is held back) 4

Start
Map M

Wheel: Thrustmaster T300RS (winmm joystick1)

Steering and pedals are native (input.map):

- Throttle / brake, analog: joystick1 Down/Up
- Steer, analog: joystick1 Left/Right

Buttons are typed by i76-remap.ahk. Hold button 6 for the shift column. Buttons 2, 4, 9, 10, 13 hold their key while pressed; the others tap once.

#	Control	Base	Shift (hold 6)
1	L1 left paddle	Headlights H	Fire selected weapon Left mouse button
2	R1 right paddle	Fire selected weapon Enter	Target in front Q
3	cluster	Cycle weapon Tab	Combat view (toggle) V
4	cluster	Handbrake Space	Reverse (toggle) X
5	cluster	Special 1 (nitrous slot) 6	Special 2 7
6	cluster	SHIFT (hold)	
7	SE (share)	Fire hardpoint 3 3	Fire hardpoint 4 4
8	OPTIONS	Target nearest enemy T	Clear target U
9	R2	Horn G	Look at target E
10	L2	Horn G	Radar range R
11	L3	Headlights H	Radar camera K
12	R3	Ignition (start engine) I	Binoculars B
13	PS	Horn G	Poetry P
hat	D-pad up	Headlights H	Gear up .
hat	D-pad right	Map M	
hat	D-pad down	Ignition (start engine) I	Gear down ,
hat	D-pad left	Notepad N	

Status. Wheel: "STATUS 2026-08-01: WORKING AND PLAYED" (WHEEL-T300.md). Buttons rebalanced 2026-08-08; of the rebalanced buttons the docs record only the held horn as confirmed in the game (FIGHTERSTICK.md).

Stick: CH Fighterstick (winmm joystick2)

Stick deflection: gearbox and handbrake

▲ Reverse (toggle) X

◀ Gear down , stick ▶ Gear up .

▼ Handbrake Space

Cone hat (POV): look, held

▲ Look down Down

◀ Look left Left cone ▶ Look right Right

▼ Look up Up

Convex serrated hat: direct fire (buttons 5 to 8)

▲ Fire hardpoint 2 2

◀ Fire hardpoint 5 5 hat ▶ Fire hardpoint 3 3

▼ Fire hardpoint 4 4

Castle hat: targeting (buttons 9 to 12)

▲ Target in front Q

◀ Radar range R hat ▶ Next target V

▼ Target nearest enemy T

Trim hat: displays and nitrous (buttons 13 to 16)

▲ Special 1 (nitrous slot) 6

◀ Map M hat ▶ Notepad N

▼ Combat view (toggle) V

Grip buttons

#	Control	Action
1	trigger	Fire selected weapon Enter
2	top red (pickle)	Fire hardpoint 2 2
3	back-side (MODE)	Special 1 (nitrous slot) 6
4	pinky red	Look at target E

All stick controls are typed by i76-ch-fighterstick.ahk. Forward = reverse only while held; back = handbrake while held; left / right = one gear per movement. Weapon link is on the keyboard (F) only.

Status. Stick: "Confirmed in the game, 2026-08-08, control by control": trigger, the three hats, special 1, cone-hat glance, stick axes (FIGHTERSTICK.md). Pickle (2) and pinky (4) are not in that table.

Interstate '76: Stock 1997 keys vs ours

i76-everywhere control map (WASD-style). This is not the 1997 key layout; the last page compares the two.

• = **changed** (23 of 46 rows). Every letter, number and punctuation key is ignored while Shift or Ctrl is held, in both maps.

Action	1997 keys	This project
Throttle / brake, analog	<i>not bound</i>	Joystick 1, forward / back axis •

Status. 1997 column: input.map of GOG's offline installer 2.1.0.17 (stock-2.1.0.17.json). Its plain arrow tokens (UpArrow ...) versus the Grey set have not been checked on a Windows keyboard by anyone on this project. To keep the 1997 keys: setup-windows.ps1 -GameDir <game folder> -Controls stock -ControlsOnly
